

Adaptive Consulting provides specialist consulting to companies in the Supply Chain.

With experience across various industries such as bottling to textiles, stevedoring to logistics, and

manufacturing to service management, our consultants have what it takes to help your business stand up and be counted in a competitive marketplace.

Our Value Proposition

By reviewing your current systems and working closely with the relevant people, Adaptive Consulting can help your business:

- Increase the accuracy of data and/or information in your systems
- Increase the visibility of products, transactions and/or information internally as well as externally (via customer facing or business to business portals)
- Increase the speed of data collection and processing
- Improve it's cashflow (as a result of accurate data such as stock balances, and through timely customer invoicing, etc)
- Reduce it's operating costs (less time spent correcting data or answering customer queries)
- Implement systems and technology that will enable your business growth or expansion, instead of holding it back

Project Experience

- Implementing ERP, CRM, Transport Planning, Barcode Scanning and other Supply Chain systems
- Experienced across systems that cover all aspects of the supply chain, from product creation to consumption

- Automating of manual, repetitive and time consuming processes
- Development of software applications spanning mobile applications to web-enabled applications
- Integrating various systems and developing interfaces between them

Service Offerings

- Subject Matter Expertise (Transport Planning, Transport Management, Inventory Management, Warehouse Management, Barcode Scanning)
- Software Development
 - Customer Self-Service enabling applications
 - Barcode scanning applications
 - EDI / Data Interchange / Business to Business messaging applications
 - System Integrations (any combination of old and new systems)
 - Single view of data (from multiple systems)
 - Database Driven Web-Applications
- Project Management
- Risk Management
- Database Expertise (troubleshooting, recovery, analysis & reporting)
- KPI Monitoring & Reporting
- Strategic Systems Review (recommend to bring in line with strategy/directions)
